

API URL: <https://private-f3b4b-interview2.apiary-mock.com/data>

Use: Bootstrap, JQuery, SCSS, HTML

Task:

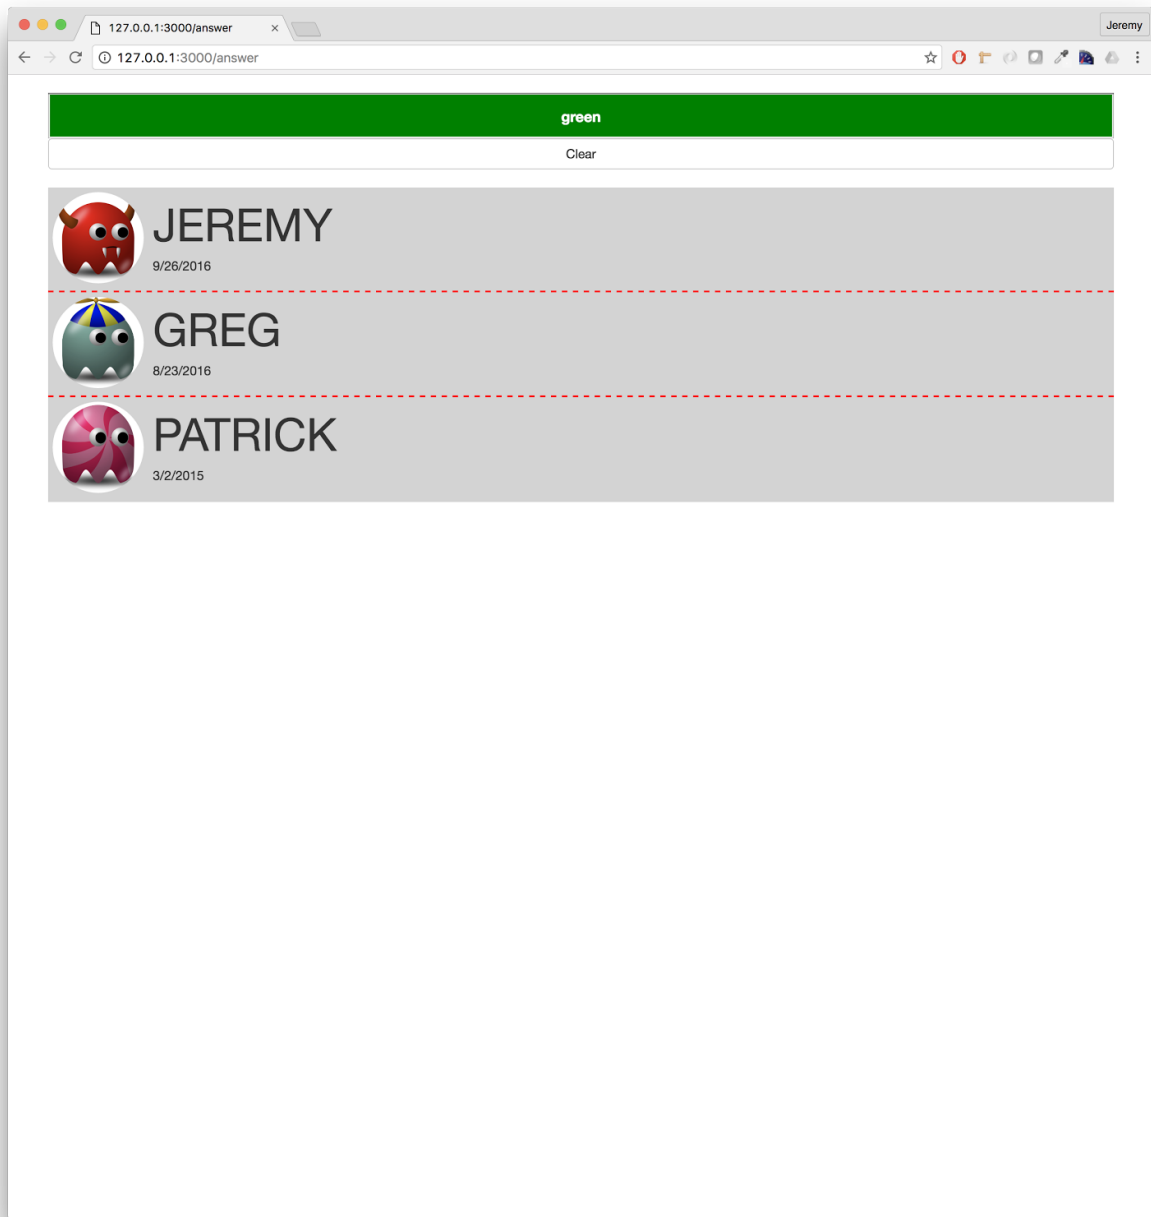

- Either set up a web server to handle this or do it entirely front end. Up to you.
- Create a page that matches the attached screenshots for desktop size and mobile sized devices using responsive css (values in image may differ from data in api response)
- Match the styling as close as possible. Default fonts were used.
- Format the “timestamp” property to match m/d/yyyy
- The rows should be ordered chronologically, oldest first.
- When a row is clicked, have the “secret” property be shown in the input at the top of the screen
- Change the background color to the value of the “secret”
- When the “clear” button is clicked, reset the input.
